DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 9 and 13 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims 9 and 13 are directed to a computer program element per se, not embodied in a tangible medium. Since the computer program element is without a computer readable medium to realize its functionality, it is nonstatutory functional descriptive material (See MPEP § 2106).

Allowable Subject Matter

2. Claims 1-8 and 10-12 are allowed.
3. The following is a statement of reasons for the indication of allowable subject matter: Neither Chen et al. (US Patent No. 5,726,920) nor Pellegrini et al. (US Patent No. 6,700,950) teach a method, device or program for monitoring process parameters of a manufacturing process that includes, storing an unspecific value for a hierarchical level if no specific value is stored in an object data record corresponding to the hierarchical level, storing process data for at least one process parameter, comparing the stored process data with a stored limit value and iteratively processing the hierarchical levels of the object data record having a specific value with the stored process data.

Response to Arguments

4. Applicant's arguments with respect to claims 9 and 13 have been considered but are moot in view of the new ground(s) of rejection.
